

**Village of Sussex Corner**  
**Policy # 2012 – 05**  
**Public Notification of Water Main Flushing**

---

**Background:**

The Works Department of the Village of Sussex Corner schedules a complete flushing of the water mains twice a year as part of the water system maintenance program. This usually occurs in the second and fourth quarters of the year. During the flushing exercises, the users of the water system may experience reduced water pressure and in some cases they may notice a slight discoloration in the water from the system. The Works, Water and Sewer Committee, in a meeting held on June 6, 2012, recommended that a policy be drafted such that the Village would issue a public notification in advance of each of the bi-annual flushing exercises.

**Policy Statement(s):**

Village Council hereby establishes a policy whereby the Village of Sussex Corner shall provide public notification in advance of each of the twice yearly scheduled water main flushing exercises. Such notices shall be issued the week prior to the scheduled event(s) via a posting to the Village website and a public notice in the Kings County Record.
